WHY IS GUARDIAN ASSIST NEEDED?

There is an urgent need for client-focused, professional, standards-based conservators and guardians to provide a more personalized alternative than currently exists if family members are unable to serve. Guardian Assist will enable more people to create Advance Directives by providing trained professionals who can serve as Health Care Agents and Attorneys-in-Fact for individuals who have no one to appoint or need successor decision-makers.

WHAT DOES GUARDIAN ASSIST DO?

Guardian Assist will provide personalized, compassionate, dignified health care and financial services as Guardians, Conservators and decision-makers appointed through Durable Powers of Attorney to adults in need by balancing autonomy with protection through thoughtful decision making.

Guardian Assist educates the community about the need to create Durable Powers of Attorney. We advocate for people in need by providing Guardians, Conservators and decision-makers who follow the National Guardianship Association Standards.

Guardian Assist services will allow for informed choice in the least restrictive manner based on an individual's values and preferences.
